

ACTIVITIES OF THE HERITAGE TIME CAPSULE (HTC) PROJECT TEAM IN AFRICA

Akua Asantewaa Akosah-Yentumi
Africa Lead – HTC Project

The Heritage Time Capsule Project (HTC) in Africa is gathering momentum across the various member societies (MS). With Akua as the lead for this project in the Africa region, a committee made up of engineers from 6 Member Societies (MS) has been created and liaises with the various MS executives to push for participation and representation in this project.

The Africa Region committee has held a number of meetings since its inception in October 2023 to encourage submissions from the MS', create a theme, develop program outline and more recently organize a workshop which was held on the 12th of August 2024. This workshop was open to all African MS' and it's aim was to provide a better understanding of the project to the MS Liasons. Sukumar Pathmanandavel (Lead - HTC Design team), Charles MacRobert (HTC Design team member) and Marawan Shahein (ISSMGE - VP Africa) served as resource persons for this workshop. The workshop proved to be helpful.

You are encouraged as an MS or individuals to contribute to this project.
